

Relocation of Zeynel Bey Tomb has started - Struggle continues

This morning the planned relocation of the Zeynel Bey Tomb has started. Unfortunately our concerns and critic has not been taken into account. This step is a clear disrespectfulness and a crime against history and cultural heritage. We will follow up this case with all legal and democratic means. Further we will thematize the covering of the historical bridge pillars.

We will never give up our struggle against the destructive Ilisu Dam which is a huge destruction of social, cultural and ecological life in the Tigris Valley!
