

[New report on the Ilisu Project](#)

On September 11, 2017 the Initiative to Keep Hasankeyf Alive has published a new report on the Ilisu Dam and Hydroelectric Project. It includes the general description and the current situation of the Ilisu Dam and Hydroelectric Powerplant Project. It gives the basics for interested people working politically on the Ilisu Project, one of the most controversial dams worldwide as it would lead to grave social, cultural and ecological impacts in a larger region. To download the report click the following link:
